North of Qatar Tour

North of Qatar is not like real North with cold weather, but still it must be seen for sure! Our drivers pick you up from any convenient for you place and get you to one more great city of Qatar - Al Khor. Once famous as a centre for the pearling industry, Al Khor is a pleasant town with an attractive corniche, a small dhow yard and a lively fish market. We are going further and driving to the east coast of the country to the Al Dhakharia Village. There you will find a lot of authentic places of interest, as all local people are Pearl-divers, following no other occupation but fishing. After that we offer you to have a good rest on the seashore at the Ruwais beach and visit the Dhow boat harbor. Our last destination will be Al Zubara - a place of great archeological importance because of its old fort. For our ancestors, Al Zubarah was a thriving pearl fishing and trading port. Now it's Qatar's largest heritage site, with its impressive city wall, ancient residential palaces and houses, markets, industrial areas and mosques. It's one of the best-preserved examples of an 18th and 19th century Gulf merchant town and in 2013 was named a UNESCO World Heritage site. After visiting all these fascinating places we will deliver you back home, pleasantly tired and full of good memories.

Already got tired of the city? No way! We will pick you up and show you more places of interest in Doha. Ride 80 km from the city by our 4x4 off-road vehicle to the Film City, where everything conveys a sense of a real Arabic town with mud-brick made houses with wooden doors. Traveling along the dusty trail with a picturesque view on waves of the Zekreet Peninsula, you will observe completely different landscapes, and, as a result, you will reach the famous Richard Sierra Sculpture (also called East-West/West East). This breathtaking sculpture in the Brouq nature reserve spans over a kilometre and comprises four steel plates, each over fourteen metres in height. Before you come back to Doha we will show you one more fascinating place - Ras Abrouq Formations. Located in the northern part of Dukhan and distinguished by its natural sandy beaches and wild deer reserve, Ras Abrouq Rock Formations are a lunar-like landscape of limestone rock formations sculpted by the wind.
